

# Danielson Framework 2011 vs. 2013

1. Move quickly to the table that corresponds to the number on your name badge.
2. Take a component from the stack of 2011 and 2013 versions of the Danielson Framework. Make sure you have matching components from Domain 3 (3a, 3b, etc.).
3. Individually, compare the two versions. Highlight changes/additions on the hardcopies. Look for trends and what they mean to you.
4. With your tablemates, move to one of the 5 charts around the room and write something pertaining to one of the changes to the component on the chart. Use the markers provided.
5. At the signal, move to the next chart. If this is your component, read the notes already written on the chart. With your group's help, add one of your highlights to the chart.
6. At the signal, move to the next chart.
7. Continue the process until you have moved to all 5 charts.
